

Acknowledgments

The Millennium Project of the American Council for the United Nations University was sponsored in its 2005–06 research program by:

- Applied Materials
- Army Environmental Policy Institute, U.S. Army
- Dar Almashora, for Kuwait Petroleum Corporation
- Deloitte & Touche, LLP
- Ford Motor Company

with in-kind support from:

- Smithsonian Institution
- World Federation of United Nations Associations
- World Future Society

The 34 chairs and co-chairs of the 26 Millennium Project Nodes, plus their members who help select participants, translate questionnaires, and conduct interviews, were essential for the success of the research conducted in this and previous years.

Theodore Gordon, Jerome Glenn, and Elizabeth Florescu were partners in the research through this volume, with research and administrative assistance from Hayato Kobayashi. Special acknowledgment is given for Theodore Gordon's quantitative and conceptual leadership in the further development and assessments of the State of the Future Index in Chapter 2; for Jerome Glenn's leadership on the cumulative research on the 15 Global Challenges in Chapter 1; and for Elizabeth Florescu's research and organization of environmental security issues in Chapter 4. The Global Energy Scenarios presented in Chapter 3 received input from 173 participants around the world. Scenario 1: *Business as Usual* was written by T. Gordon, Scenario 2: *Environmental Backlash* was written by J. Glenn, Scenario 3: *High-tech Economy* was written by Jose Cordeiro, and Scenario 4: *Political Turmoil* was written by both J. Glenn and T. Gordon. Chapter 5, *Tenth Anniversary Reflections*, was written and synthesized by J. Glenn with input from the Planning Committee of the Millennium Project. Principal members of the environmental security scanning team who prepared the monthly reports summarized in Chapter 4 were Jerome Glenn, Elizabeth Florescu, John Young, Theodore Gordon, Robert Jarrett, Peter Rzeszotarski, and Hayato Kobayashi.

Linda Starke provided editing of the print section. John Young provided proofreading assistance for several sections in both the print and CD sections. Elizabeth Florescu did the production and layout of both the print and CD sections of this book under a very tight deadline, while Elizabeth and Octavian Florescu designed the cover.

Special thank you to Susan Jette for her continued additions to the annotated scenario bibliography in the CD, to Peter Yim, President of CIM Engineering, Inc. for hosting the

Project's Web site and internal email lists, and to Frank Catanzaro for experimental collaborative software applications.

The Interns who helped with the Millennium Project in general and updated and improved the 15 Global Challenges were Lucia Castro, Alzbeta Hobstova, Megan Kim, Jeff Love, Jesse Lynch, Steve Mahmud, Yuki Nambu, Theodora Panousakis, Eric St-Pierre, Fouzia Seguer, Martha Vogler, and Hana Yoshimoto. And an additional thank you to Lucia Castro and Alzbeta Hobstova who produced the survey of organizations working on women and gender issues around the world included in the CD, and to Marvin Fried who helped research potential political problems for the global energy scenarios. We wish them all well in their future careers.

Special contributions to update and improve the descriptions of the 15 Global Challenges were received from Rosa Alegria, Frank Catanzaro, Cornelia Daheim, Bill Daul, Elizabeth Florescu, Will Forster, Theodore Gordon, John Gottsman, Barbara Haering, Ana Jakil, Edward Martin, Tom Murphy, Concepción Olavarrieta (and members of the Mexican Node), David Schrunk, Paul Werbos, and John Young.

Congratulations to the Mexican Node for initiating the Millennium Awards for middle-school children's ideas to address the 15 Global Challenges and the futures dictionary-encyclopedia project, to the Gulf Node for initiating the Global Energy Scenarios study, to the European Millennium Project Initiative (EuMPI) for the *Spider* project, and to the Central European Node for continuing leadership in studies of Haiti for a *Global Partnership for Development* (see Chapter 8 on the CD).

Special thanks to the sponsors of the Millennium Awards in Mexico: Mexican Ministry of Education, Pfizer, Hewlett-Packard, Ibope-Agb, Editorial Santillana, Pack Tag, El Gallito Camp, and Grupo Nestle Mexico.

Millennium Project Node Chairs

The Millennium Project interconnects global and local perspectives through its Nodes (groups of individuals and institutions). They identify knowledgeable and creative people in their region, translate questionnaires, conduct interviews, and disseminate the project's findings. The Node Chairs are:

Argentina/other Latin American Sub-Nodes

Miguel Angel Gutierrez	Eduardo Balbi
Latin American Center for Globalization and Prospective Buenos Aires, Argentina	Escenarios y Estrategia—EYE Buenos Aires, Argentina

Australia

Paul Wildman
The Futures Foundation
Brisbane, Australia

Brazil

Arnoldo José de Hoyos
and Rosa Alegria
São Paulo Catholic University
São Paulo, Brazil

Brussels-Area

Philippe Destatte
The Destree Institute
Namur, Belgium

Canada

Ruben Nelson	David Harries
